# Your Trusted Partner

Delivering market leading pharmacy brands in Home Diagnostics, First Aid, Sports Therapy and Advanced Wound Care has been our focus for over 35 years.

## Connecting Community Health

From treating small cuts to managing long-term conditions, we have worked alongside healthcare professionals and pharmacies to design and deliver trusted medical products. Our focus is on real-world needs, providing the tools and support that make a lasting difference to patients, families, and communities.

## Empowering Everyday Health

With our trusted home diagnostics and health management solutions, patients can monitor and manage conditions like high blood pressure, diabetes, and asthma with confidence.

By supporting self-care at home, we help people live healthier, more independent lives.

## Trusted by First Responders

From workplaces to sports fields, Fleming Medical First Aid products are relied upon when it matters most. Our expertly designed kits and supplies help healthcare professionals and communities respond quickly and effectively to emergencies.

## Connecting Pharmacy with Trusted Brands

Delivering market leading pharmacy brands in Home Diagnostics, First Aid, Sports Therapy and Advanced Woundcare has been our focus for over 35 years.

We also design, produce and deliver pharmacy exclusive products under our Medicare, Physiologix and LifeSense brands. We pride ourselves in providing you with an unrivalled multi-level offering of value-added services and quality products. We have listened to our customers' needs and adapted our products and services to meet and exceed those needs.

Let's introduce you to

**LIFESense®**

PATIENT PACK

Lifesense® products can be synced with the Lifesense® App to measure, track & share results.

### Actively manage your health

Your health journey is personal and your LifeSense Patient Pack is here to support you every step of the way.

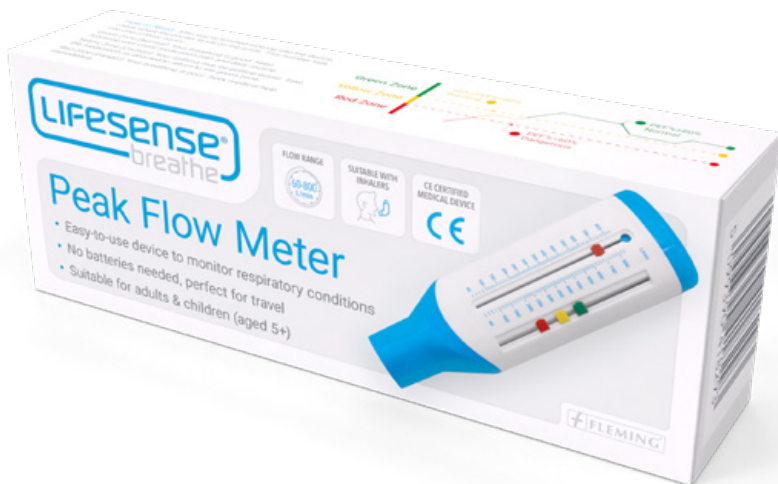

Within this box, you'll find quality certified, easy-to-use medical devices designed to help you monitor key aspects of your health from the comfort of your own home.

**NEW Lifesense® Breathe Spacer for Inhaler**

The Lifesense® Breathe Spacer is a device used with an inhaler to make breathing in medicine easier and more effective.

Also known as a holding chamber, the device keeps the medicine in place briefly, allowing you to inhale it more deeply into your lungs.

**NEW Lifesense® Breathe Peak Flow Meter**

This easy-to-use peak flow meter gives quick, accurate readings to help you monitor asthma or COPD, catch early warning signs, and stay in control of your respiratory health.

**NEW Lifesense® Breathe Peak Flow Meter**

For use with the Lifesense® Breathe Peak Flow Meter.

**NEW Medicare Burn Spray 50ml**

Treat minor burns and sun-exposed skin quickly and gently with Medicare® Burn Spray, a cooling hydrogel enriched with hyaluronic acid, aloe vera, and calendula.

**NEW Medicare Pill Organiser Range**

Bright, easy-use, product design. Lightweight and durable, easy access and travel friendly.

ALOE VERA & SEA SALT

Rapid relief from nasal congestion

Moisturises ear canal for clean, healthy ears

ALOE VERA & MALVA SYLVESTRIS

### NEW Medicare Nasal Spray

Medicare Nasal Spray provides a gentle and effective way to care for your nasal passages.

### NEW Medicare Ear Spray

Medicare Ear Spray offers a safe and effective way to care for the ears every day.

**NEW  
PRODUCTS**

**NEW Medicare Metatarsal Gel Sleeve**

Provides targeted relief by offering metatarsal support and soft cushioning.

**NEW Medicare Gel Arch Wrap**

The shock-absorbing Biogel® reduces pressure and alleviates pain by supporting the arch.

**NEW Medicare Gel Toe Crests**

Reduces friction and pressure caused by dropped or misaligned toes.

**NEW Medicare Hammer Toe Support**

Designed to provide effective support and relief for curled toes and hammer toe.

# Blood Pressure Monitoring

Lifesense® devices allows your customer to monitor their own symptoms, to get a better understanding of their condition, and take an active role in their health maintenance or recovery.

## Blood Pressure Monitors

Taking regular blood pressure readings at home can help your customers identify conditions such as hypertension. Due to barriers such as white coat syndrome, people may feel uncomfortable in the consultation room and blood pressure readings may not reflect their usual level.

With Lifesense® blood pressure monitors, a person with a health concern can measure their blood pressure and track it through the App and portal. With the Care Circles function, GPs and family members can monitor their readings and get notified when they are too high or too low.

# Take control of your health with the NEW Lifesense® A7+ Blood Pressure Monitor

## Lifesense® Vitals A1 Blood Pressure Monitor

Our Lifesense® Vitals A1 Blood Pressure Monitor is an easy to read, automatic upper arm blood pressure monitor designed with both comfort and accuracy in mind.

The slim, portable design makes this a great product to bring with you when travelling or to discreetly store in the home.

The high quality blood pressure cuff measures during inflation, making the measurement time shorter and a lot more comfortable.

- Digital LCD display (60mm x 41mm).
- Cuff circumference: 22cm~32cm.
- Large soft touch buttons.
- Large text for high visibility.
- Irregular heartbeat detection.
- 2 x 60 memory groups per user.
- Power: 4 x AAA batteries (included).

## Lifesense® A2 Plus Blood Pressure Monitor

### Bluetooth®

The Lifesense® A2 Plus Bluetooth Blood Pressure Monitor is easy to use, lightweight and portable, making it convenient to check your blood pressure from the comfort of your own home.

It uses a comfortable upper arm cuff and presents your systolic, diastolic and pulse rate results on the easy-to-read digital display. The readings are also transferred by Bluetooth to the Lifesense® App on your smartphone or tablet.

- Bluetooth enabled.
- Large easy-to-read display: 60mm x 77mm.
- Cuff Size: 22-32cm.
- Large text and soft touch buttons.
- 2 x 99 Memory groups per user.
- Power: 4 x AA batteries (included).

### Schiller BR-102 Plus Ambulatory BP Recorder

The Schiller BR-102 Plus Ambulatory BP Recorder is a discreet, compact, long term blood pressure monitoring unit which provides the highest level of accuracy while allowing the patient to go about their daily lives undisturbed.

Using both auscultatory and oscillometric measurement, the motion-tolerant technology prevents re-inflation and failed readings.

- Recording for 24 or 48 hours.
- Voice recording of patient data.
- Examination of adults and children thanks to a special algorithm.
- Oscillometric and auscultatory measurement.
- Cuff only inflates as much as needed, the unit can barely be seen, felt or heard during use.
- Free programming and storage up to 4 individual measurement programmes.
- On current HSE Contract HSE6909.
- Auscultatory measurement for precision (NIBP).
- Oscillometric measurement for reliability (NIBP).

## Schiller Fred PA-1 AED

The Schiller FRED PA-1 Defibrillator starts up immediately and guides the rescuer step by step during the entire resuscitation process. It is embedded with the FreeCPR feature, the only system that helps the rescuer to reach the proper compression frequency without any additional hardware.

- Analyses the patient's heart rhythm and determines whether a shock is necessary.
- Prompts the rescuer to deliver the shock by pressing the shock button.
- FRED PA-1 immediately advises to call the emergency number directly listed on the device.
- Chest compression assistant:
  - Metronome.
  - FreeCPR: Feedback on the frequency of the chest compression.
- Two types of electrodes, for adults and children.
- 10 Year Warranty.

## Comfort and care with every breath

Gentle, effective relief for asthma, COPD and allergies

Support your customers' everyday breathing with our trusted Medicare nebuliser and humidifier range – designed for effective respiratory therapy, comfort, and home air care.

From portable and wearable nebulisers to quiet home compressor units and modern humidifiers, this range helps pharmacies support patients managing asthma, COPD, allergies, colds and seasonal respiratory conditions with confidence.

Reliable, easy to use, and pharmacy-friendly, the Medicare respiratory range delivers clinically focused solutions for today's home healthcare needs.

## Medicare V1 Compressor Nebuliser

The Medicare V1 Compressor Nebuliser is a robust nebuliser, ideal for home-based, frequent use by adults or children. This highly efficient nebuliser combines a short inhalation time with intelligent medication delivery thanks to its powerful compressor.

The compressor generates a stream of compressed air which breaks up liquid medication and converts it into a mist so it can be easily and more effectively inhaled by the patient through the mask, nosepiece or mouthpiece.

- Suitable for people with respiratory illnesses like Asthma, COPD and Cystic Fibrosis.
- Particle size: 5µm.
- Medicine capacity: 8ml.
- Comes with full compressor nebuliser accessory kit.
- Suitable for adults and children.

### Medicare V2 Portable Nebuliser

The Medicare V2 Portable Nebuliser allows you to comfortably deliver medication discreetly and on the go.

Its compact size fits comfortably in the palm of your hand but is still powerful enough to effectively deliver needed medication for respiratory conditions like a simple cough, Asthma, COPD and Cystic Fibrosis.

- Innovative U-shaped medicine chamber engineered to maximise medication delivery and allow use from any angle.
- Battery and USB charging.
- Made with stainless steel which ensures quality and longevity.
- Easy to clean and disinfect.
- Ambient noise: ≤35dB.
- Comes with accessories kit and storage bag.

### Lifesense® Breathe Spacer for Inhaler

The Lifesense® Breathe Spacer is a device used with an inhaler to make breathing in medicine easier and more effective. Also known as a holding chamber, the device keeps the medicine in place briefly, allowing you to inhale it more deeply into your lungs.

Using a spacer can help ensure you get the right amount of medicine, reduce waste, and make using an inhaler easier for both adults and children.

- Lightweight and portable for everyday use.
- Easy to assemble and disassemble for cleaning.
- Use with adult or child mask, or directly via the mouthpiece.
- Latex-free Materials.

#### How to Use:

CODE	ORDER QTY
MD1013	1

### Lifesense® Breathe Peak Flow Meter

This easy-to-use peak flow meter gives quick, accurate readings to help you monitor asthma or COPD, catch early warning signs, and stay in control of your respiratory health.

- Easy-to-use device to monitor respiratory conditions.
- No batteries needed, perfect for travel.
- Suitable for adults & children (aged 5+).

#### How to Read:

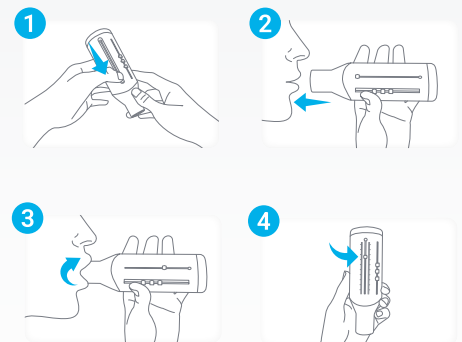

After you've finished blowing into the device, check where the pointer lands on the scale. This number falls into one of three zones:

**Green Zone (Normal):** Your breathing is good. Keep following your usual medication plan and daily routine.

**Yellow Zone (Caution):** Your asthma may be getting worse. Take the medication as directed to return to the green zone.

**Red Zone (Danger):** Your breathing is poor. Seek medical help immediately.

For light compression and fixation

### Mediform Conforming Bandage

Mediform Conforming Bandage is a polyamide and viscose bandage with light compression. The material is soft and highly adaptable.

- Comfortable.
- Soft, lightweight, durable bandage.
- Conforms well to the body, ensuring patient comfort.
- Ideal to hold dressings snugly in place.
- Self-adhesive, attaching to itself but not the skin.
- Breathable, allows air to circulate which promotes healing.
- Flexible to allow freedom of movement.

CODE	SIZE	ORDER QTY
MD0772	5cm x 4m	40
MD0773	8cm x 4m	40
MD0774	10cm x 4m	20
MD0775	15cm x 4m	20

#### Product Tip

Conforming bandage can be used to hold wound dressings of all types in place with light compression effect.

For comfortable, strong compression

### Medicrepe Cotton Crepe Bandage 4.5m

Medicrepe Cotton Crepe Bandage is a medium stretch bandage with constant elasticity and can be used for compression bandaging, securing dressings and devices, sprains and strains, protective bandaging, oedema control and partial immobilisation.

- Comfortable, soft, stretchable bandage.
- 100% Cotton.
- Can be washed and sterilised.
- Available in 4 sizes.

CODE	SIZE	ORDER QTY
KO3482	5cm x 4.5m	12
KO3483	7.5cm x 4.5m	12
KO3484	10cm x 4.5m	12
KO3485	15cm x 4.5m	12

#### Product Tip

Conforms well to the body, ensuring patient comfort whilst maintaining constant elasticity.

For comfort and flexibility

### Medicrepe Elastic Support Bandage 5m

Medicrepe Elastic Support Bandage for the first aid treatment of emergency injuries, sprains, strains and in other conditions in which light support is required.

The bandage is very durable and versatile and can be washed and sterilised easily. In the case that some elasticity might be lost during use, it will be restored again after washing in warm soapy water.

- Comes with special clips to secure bandage once desirable level of compression has been achieved.
- Cotton, polyamide and elastane high stretch bandage.
- Lightweight, fray resistant and durable.
- Skin friendly.

CODE	SIZE	ORDER QTY
MD9009	6cm x 5m	24
MD9010	8cm x 5m	24
MD9011	10cm x 5m	12
MD9012	15cm x 5m	12

#### Product Tip

Due to the high quality of fabric, there is superb elasticity. In the case that some elasticity might be lost during use, it will be restored again after washing in warm soapy water.

For high compression

### Medicare Elastic Adhesive Bandage

Medicare Elastic Adhesive Bandages (EAB) offer firm directional support for strains, sprains and minor injuries. It is also used as a relieving and stretch compression bandage.

The adhesive elastic bandage provides compression support for joints during high-stress sport activity. The elastic sports bandage help to minimise swelling and provide additional support as an overwrap.

- Bidirectional easy tearing.
- Hypoallergenic skin friendly adhesive.
- Central yellow line for ease of application and correct alignment.
- Ventilated fabric allows skin to breathe.
- Easy to unroll and easy to use.

- Aluminium splint with foam padding.
- Adjustable velcro fasteners.
- No tape needed.
- 2 pcs per pack - medium and large.

CODE	ORDER QTY
MD400529	4

## Emergency Response

You may happen to witness or come across a situation where someone has collapsed. The first thing to do is call emergency services.

While you are waiting for an ambulance to arrive, you can carry out some crucial steps to help make a person comfortable or even help with a greater chance of survival. Make sure to enrol in a CPR course so you can help in the event of an emergency.

1

### Check for Consciousness

- Ask a question or give a command.
- Speak loudly and clearly to the casualty.
- A casualty in a serious state of “altered consciousness” may mumble, groan, or make slight movements.
- A fully unconscious casualty will not respond.
- If casualty is unconscious, place in recovery position and seek help immediately.

2

### Open the Airway

- Remove any obvious obstruction from the mouth.
- Tilt the head back and lift the chin.
- If the casualty has stopped breathing, and you are competent to give CPR (Cardiopulmonary Resuscitation), do so.
- Otherwise, place casualty in recovery position and seek help immediately.

3

### Check for Breathing

- Look for chest movements.
- Listen for sounds of breathing.
- Feel for breath on your cheek.

4

### Check for Pulse

- Press your first finger and your middle finger to the side of the neck, just under the jaw and beside the windpipe - don't use your thumb as it has its own pulse. Press the skin lightly to feel the pulse.

## Broken Bones/Fractures

- If a broken bone is suspected, obtain expert help.
- Do not remove casualty unless they are in a position which exposes them to immediate danger.
- Steady and support the injured part if possible with your hands, apply a Medicare Triangular Bandage if their wrist or arm is affected.

## Head Injury

- If there is a scalp wound, replace any skin flaps, and using a clean pad, press down firmly and evenly over the wound. Once bleeding is controlled, secure the dressing in place with a bandage.
- Check casualty's level of response to simple questions, if consciousness is impaired send for an ambulance immediately.

## Chemical Burns

- Always wear protective gloves or clothing when dealing with any chemical injuries to avoid contaminating yourself with the chemical.
- Remove any contaminated clothing from the casualty which is not stuck to the skin.
- Flush area affected with plenty of Medicare Sterile Saline Solution to ensure the area is clean of remaining chemicals. Apply a Medicare Burn Dressing to any exposed, damaged skin.
- Send casualty to hospital as soon as possible.

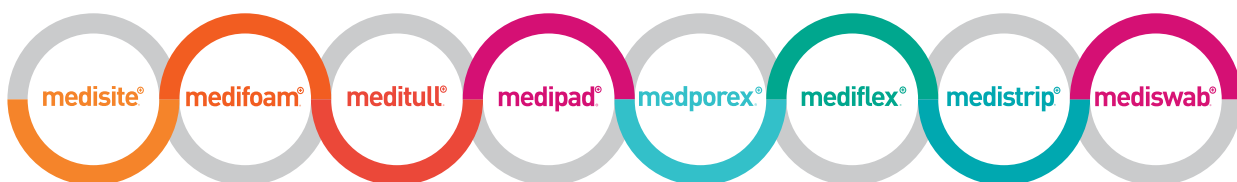

### The Recovery Position

- Turn casualty onto their side, then lift the chin forward in open airway position and adjust hand under the cheek as necessary.
- Check casualty cannot roll forwards or backwards and monitor breathing and pulse continuously.

A sterile, soft, non-woven dressing with high breathability.

Designed especially for treating low to moderately exuding wounds such as surgical incisions, minor burns, cuts and abrasions.

**Air-permeable:** Allows the skin to breathe.

**Hypoallergenic:** Made from a non-woven material backed with a latex-free adhesive.

**Absorbent:** Highly absorbent wound pad with a non-adherent wound contact layer.

**Flexible:** The dressing is suitable for use on joints or awkward body contours.

**Breathable:** The porous structure of the non-woven fabric ensures air and water-vapour permeability.

### Medporex Adhesive Surgical Dressing

- Adhesive.
- Sterile and individually packed.

CODE	SIZE	ORDER QTY	PACK SIZE

MD1162	10 x 15cm	1 Pack	30
MD1163	10 x 20cm	1 Pack	30

A foam dressing for moderate to highly exuding wounds, ulcers, second degree burns and traumatic wounds.

**Non-adhesive wound contact layer:** Does not adhere to a moist wound but forms a gentle bond between the dressing and the wound. This sealing effect also helps minimise the risk of maceration.

**Silicone Layer:** Minimises pain and damage to the wound and skin at dressing changes. The silicone layer gently moulds to the contours of the skin which minimises skin stripping during removal.

**Absorbent:** Reliable absorption and excellent retention capacity that retains exudate whilst maintaining a moist wound environment.

**Breathable:** Soft and highly conformable and is ideal for patients with fragile skin.

### Medifoam Non-Adhesive Foam Heel Dressing

- Specifically developed to address wounds on the heel or similar anatomical areas such as the elbow where a standard dressing is not suitable.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1384/1	12 x 13cm	1 Pack	3

### Medifoam Non-Adhesive Foam Dressing

- Non-adhesive.
- Waterproof and bacteria proof backing.
- Sterilised and individually packaged.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1386/1	10 x 10cm	1 Pack	5

### Medifoam Adhesive Foam Dressing

- Self-adhesive border dressing.
- Waterproof and bacteria proof backing.
- Sterilised and individually packaged.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1388/1	10 x 10cm	1 Pack	5
MD1389/1	15 x 15cm	1 Pack	5

A soft silicone foam dressing with border for moderate to highly exuding wounds, ulcers, second degree burns and traumatic wounds.

**Non-adherent:** Soft silicone wound contact layer that does not adhere to a moist wound but forms a gentle bond between the dressing and the wound.

**Silicone Layer:** Minimises pain and damage to the wound and skin at dressing changes. The silicone layer gently moulds to the contours of the skin.

**Absorbent:** Reliable absorption and excellent retention capacity resistant to leakage.

**Breathable:** Soft and highly conformable and is ideal for patients with fragile skin.

**For use :**

- Venous leg ulcers.
- Pressure ulcers.
- Diabetic ulcers.
- Second degree burns.
- Surgical and traumatic wounds.
- Can also be used under compression bandages.

Mediflex can be removed with less risk of damaging the wound or the surrounding skin. It drastically reduces both the pain and tissue damage in wound management and without the trauma of maceration and skin-stripping, early and trouble-free healing is accelerated.

**Mediflex Silicone Foam Dressing**

- Waterproof and bacteria proof backing.
- Sterilised and individually packaged.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1164	10 x 10cm	1 Pack	5

**Mediflex Silicone Foam Dressing with Border**

- Silicone adhesive border surrounding wound pad.
- Waterproof and bacteria proof backing.
- Sterilised and individually packaged.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1171	7.5 x 7.5cm	1 Pack	5
MD1170	10 x 10cm	1 Pack	5

A breathable, transparent self-adhesive film dressing for light to moderately exuding wounds, clean, closed post-operative wounds. Made of polyurethane film which allows wounds to breathe and water vapour to escape, protecting the skin against maceration.

**Sterile:** Bacterial barrier helps protect the site against extrinsic contamination.

**Waterproof:** Patient can shower with the dressing in place.

**Hypoallergenic:** Latex-free adhesive.

**Conformable:** Non-restrictive for the patient.

**For use :**

- Superficial burns.
- IV sites.
- Abrasions.
- Lacerations.
- Superficial pressure ulcers.
- Closed surgical wounds.

**Medisite Transparent Dressing with Pad**

- Highly Absorbent: Non-adherent central wound pad.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1530	6 x 7cm	1 Pack	20
MD1531	10 x 12cm	1 Pack	20

**Medisite Transparent Thin Film Dressing**

- Transparent film allows healing process to be observed without removing the dressing.

CODE	SIZE	ORDER QTY	PACK SIZE
MD1543	15 x 26cm	1 Pack	20

Medipad is a highly absorbent non-adherent wound pad dressing for lightly exuding wounds. It has a non-adherent laminate on one side that won't disrupt healing tissue by sticking to the wound. Ideal as a primary dressing for lightly draining wounds.

**Non-adherent:** Highly absorbent non adherent wound pad on one side.

**Wound Pad:** Rapid absorption of exudates through the open weave of the wound pad.

**Absorbent:** Fast, controlled absorbency of light exudates.

**Non-woven:** The absorbent non-woven pad is also constructed to avoid strike-through.

**For use :**

- Superficial burns.
- Surgical incisions.
- Sutured wounds.
- Abrasions.
- Laparoscopy sites.
- Arthroscopy sites.
- Traumatic wounds.

**Medipad Non-Adherent Wound Pad**

- Dressing Pad.

Flexible, breathable adhesive skin closures designed for wound support post-operatively or following early suture or clip removal. Medistrip is ideal for highly contoured areas of musculoskeletal movement.

- Durable:** Non-woven fabric offers strength and durability.
- Hypoallergenic:** Non-woven material backed with latex-free adhesive.
- Breathable:** Porous backing allows wounds to breathe and vapour to escape.
- Conformable:** Stretchable fabric that conforms well to body contours and allows non-restrictive movement.
- Water-resistant:** Provides a barrier to fluids.

### Medistrip Wound Closure Strips

Meditull Paraffin Gauze Dressing consists of a leno-weave fabric of 100% absorbent cotton thread, impregnated with white soft paraffin and is used as a primary wound contact layer.

The dressing and the paraffin helps to reduce the adherence of the product to the surface of a granulating wound.

**Sterile:** Individually wrapped.

**Non-adherent:** The paraffin reduces adherence to the surface of a granulating wound.

**Soothing:** Promotes healing in burns, ulcers, skin grafts and traumatic wounds.

### Meditull Paraffin Gauze Dressing

- The dressing is used as a primary wound contact layer.

These Sterile Swabs are used for many medical purposes, especially treating open wounds. The swabs are sterile and highly absorbent, as well as being soft and gentle on the skin.

Ideal for all aspects of hospital care-hygiene, deterision, cleansing and dressing of wounds.

**Highly absorbent:** Ideal for cleaning wounds.

**Gentle:** Non-woven, soft and gentle on the skin.

**Lower fibre release:** 4 ply sterile gauze swabs.

### Mediswab Sterile Non-Woven Swabs (20 x 5's)

- Contains 20 sterile pouches, 5 swabs in each.

Medigauze Gauze Swabs are made of a pre-washed, fluff dried 100% surgical grade absorbent cotton with unique crinkle-weave pattern for loft and bulk.

Our Gauze Swabs provide fast-wicking action, superior aeration, and excellent absorbency. Finished edges on the product reduce loose ends and lint.

### Medigauze Gauze Swabs

- Medigauze swabs are suitable for controlling bleeding.
- Highly absorbent material, 8 ply 100% surgical grade absorbent cotton gauze.
- Low fibre release reducing the risk of wound contamination.
- Folded edges, prevents loose fibres and shedding.
- Soft material that is gentle on the skin.

## Degrees of Burn

When you are burned, you experience pain because the heat has destroyed skin cells. Minor burns heal much the same way cuts do. Often a blister forms, which covers the injured area. Under it, white blood cells arrive to attack the bacteria and a new layer of skin grows in from the edges of the burn.

Burns are classified as **first**, **second** or **third** degree, depending on how deep and severe they penetrate the skin's surface.

### 1st degree burn

Mildest skin burn where the epidermis is damaged. Skin will be red, slightly swollen and painful but not blistered.

### 2nd degree burn

Epidermis and part of the dermis layer of skin are damaged. Skin will be pale pink, there may be blistering and swelling.

### 3rd degree burn

Most serious burn, all three layers of the skin are damaged. The skin is burnt away and the tissue underneath may appear pale or blackened. The remaining skin will be dry with no blisters.

## Reduce the Risk of Burns & Scalds

- 1  Always keep a first aid kit in the kitchen and check the expiry dates every six months.
- 2  Keep a fire blanket and fire extinguisher near the kitchen in a place that is easy to access.
- 3  Install smoke alarms and replace batteries every year at the start of winter.
- 4  Ensure your home is fitted with a working electrical safety switch.
- 5  Check: Is the hot water in your bathroom/en suite delivered at no more than 50°C? If not, contact a licensed plumber to install mixing valves that safely lower the delivery temperature of water.

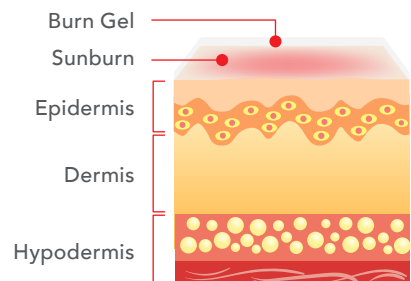

## Weather Related Injury

**Sunburn:** Give casualty fluids to drink. Apply Medicare Burn Gel or Burn Dressing to the burn. Get professional medical help immediately for severe cases.

**Cold Exposure:** Re-warm casualty by wrapping in Medicare Emergency Foil, blankets or placing in a tub of warm, not hot, water. Dry casualty thoroughly after bath. Give casualty hot liquids to drink, only if conscious (not alcohol). Consult professional medical help if indicated.

### Skin with Sunburn

Sunburn is a form of radiation burn that affects living tissue, such as skin, that results from an overexposure to ultraviolet radiation. It usually gets better within 7 days.

You can help treat your sunburn with Medicare Burn Gel or Medicare Burn Spray. It creates a protective barrier, relieves pain and cools burns.

## Burns & Scalds

- 1** Cool the burn with running lukewarm water for 10-30 minutes, ideally within 20 minutes of the injury occurring.
- 2** Remove rings or other tight items from the burnt area. Try to do this quickly and gently, before the area swells.
- 3** Apply Medicare Burn Gel to relieve pain and cool skin further. The pain from a burn can also be treated with an OTC pain reliever.
- 4** To protect against infection and minimise skin damage, apply a Medicare Sterile Burn Dressing. Gently lay the burn dressing across the burn site. Do not cover, it can be secured using a conforming bandage.
- 5** You will need to decide whether further medical treatment is necessary.

Never let a burn dressing dry completely or it will stick to the skin. Keep the burn dressing topped up with burn gel.

### Most common causes of burns

Contact with hot object

Chemical

Scalding liquid

Electrical

Fire or flame

### What not to do with burnt skin

Don't break open small blisters

Don't apply butter or oil

Don't remove clothing

Avoid fluffy cotton

Avoid putting too much pressure on burnt skin

Always seek medical advice from your doctor.

# PHYSIO LOGIX® Sports Supports

## Recover Like A Pro

Physiologix® supports offer light, medium, firm and more structured brace supports that use the latest in innovative design and fabric technologies to provide outstanding comfort and uncompromising support to aid in the recovery of injuries.

**Ultimate Jumpers Knee Support - One Size**

Designed to improve patellar tracking and elevation by applying mild pressure on the tendon below the kneecap.

- Used to help relieve patellar tendonitis caused by frequent running and jumping.
- Adjustable tension strap provides controlled compression.
- The tubular stay allows for uniform pressure to help ease pain and discomfort.
- Comfort fit for all day wear.

CODE	SIZE	ORDER QTY
PX304	OSFA	1

**PHYSIO LOGIX®**

### Ultimate Knee Support - One Size

Adjustable tension straps on top and bottom offer a varying compression and fit for weak or injured knees.

- Padded double-layer stabilisation around the kneecap.
- Lined with breathable fabric which moves moisture away from your body keeping you cool and comfortable.

CODE	SIZE	ORDER QTY
PX3511	OSFA	1

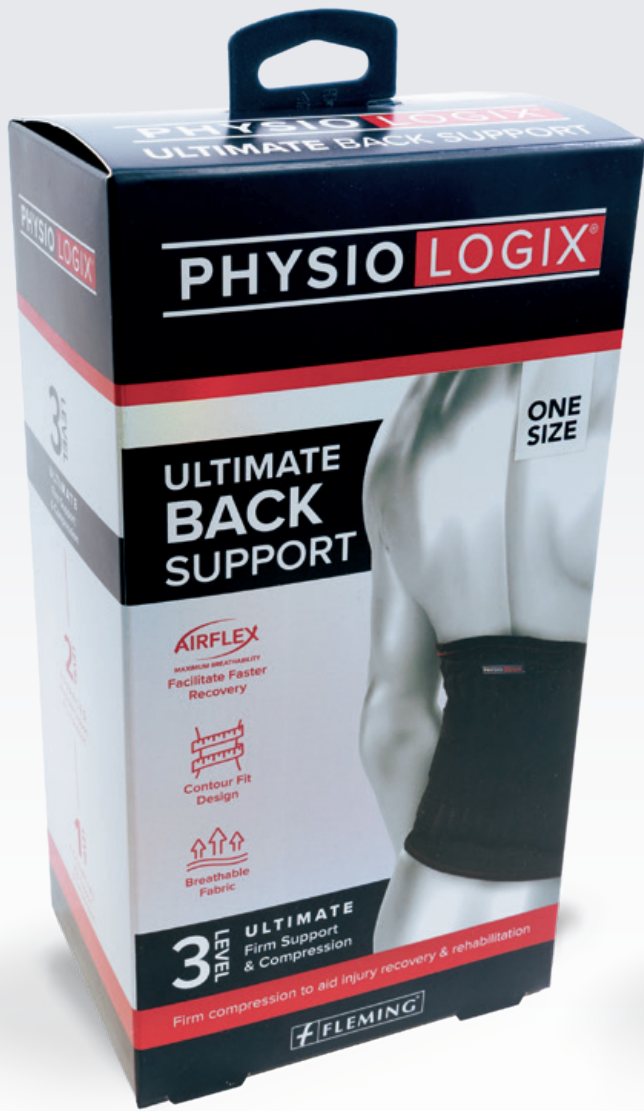

### Ultimate Thigh Support - One Size

Adjustable fit with controlled compression for groin injuries and weak or injured quadriceps and hamstrings.

- Adjustable and lightweight design helps you maintain a comfortable full range of motion.
- Lined with breathable fabric which moves moisture away from your body keeping you cool and comfortable.

CODE	SIZE	ORDER QTY
PX3520	OSFA	1

**PHYSIO LOGIX®**

**Ultimate Back Support - One Size**

Lightweight, flexible back brace conforms to the anatomical structure of your back offering increased support for back strains, sciatica and more.

- Firm, structured support through the eight flexible steel springs surrounded by a soft foam padding for extra comfort.
- Adjustable tension straps ensure a comfortable fit.

CODE	SIZE	ORDER QTY
PX3518	OSFA	1

**Ultimate Shoulder Support - One Size**

Can be worn all day for comfort against tendinitis, shoulder instability, shoulder dislocation and arthritis.

- Bilateral and adjustable shoulder support with added pocket for inserting a hot/cold pack.
- Provides a therapeutic treatment for muscle or joint pain without limiting movement.
- Adjustable fit, left or right shoulder.
- Integrated sleeve and underarm strapping for maximum comfort and compression.

CODE	SIZE	ORDER QTY
PX3506	OSFA	1

## PHYSIO LOGIX®

### Physiologix Ultimate Ankle Support - One Size

Recommended for people recently recovering from or looking to prevent ankle injuries.

- Adjustable bilateral tension straps provide controlled compression.
- Increased comfort for wearability throughout the day.
- Sectional design provides an adjustable fit.

CODE	SIZE
PX301	OSFA

### Physiologix Ultimate Multi-Wrap Support - One Size

This lightweight, durable and super stretchy support is designed for use on multiple body parts.

- Durable and reusable, this wrap helps reduce muscle strain while maintaining elasticity for long-term use.
- Provides compression and support ideal for smaller body parts such as wrists, elbows and ankles.

CODE	SIZE	ORDER QTY
PX3523	OSFA	1

- Good tensile strength with high elasticity.

Base Layer

Skin Protection  
& Comfort

CODE	SIZE	ORDER QTY	S.R.P.
MD763	7cm x 27m	16	€4.95 each

**KINESIOLOGY TAPE**  
LIGHT COMPRESSION

**Most Suitable Use Cases:**

Muscle activation and recovery, posture correction, rehab support, swelling management without restricting movement, sports performance taping.

*Elastic,  
dynamic tape*

**Physiologix Kinesiology Tapes**

Designed to provide support, lessen pain, reduce swelling, improve circulation and strengthen range of motion during sporting activities all without restricting movement.

- Suitable for hands, feet, legs and shoulders.
- Light compression and support.
- Highly elastic with medium adhesion.
- Latex-free and breathable.
- Sweat-resistant.
- Available in 4 colours (black, beige, blue, pink).

**Muscle  
Facilitation  
& Movement  
Support**

CODE	COLOUR	SIZE	ORDER QTY

MD593	Black	5cm x 5m	3

## PROFESSIONAL TAPE

MODERATE-FIRM  
COMPRESSION

### Most Suitable Use Cases:

Ankle and wrist stabilisation, thumb/finger strapping, injury prevention, limiting excessive joint movement, return-to-play support.

*Rigid  
strapping tape*

### Physiologix Professional Sports Tape

A medium stretch tape provides varied compression, while at the same time allowing comfort and freedom. The varied compression helps support an injured muscle/joint.

- Stretch material with medium adhesion.
- Flexible movement.
- Sticks to skin and itself.
- Easy to tear, no need for scissors.

CODE	COLOUR	SIZE	ORDER QTY
PX401	White	5cm x 5m	3

PX419	Black	10cm x 5m	3

Joint  
Stabilisation

**COHESIVE TAPE**

**MODERATE  
COMPRESSION**

**Most Suitable Use Cases:**

Swelling reduction, securing dressings/pads, quick pitch-side support, temporary stabilisation, first aid use.

*Self-adhesive elastic wrap*

**Physiologix Cohesive Wrap**

This highly elastic tape is unique in the fact that it sticks to itself but not to your skin or hair.

- Medium to firm compression and support.
- Durable, reusable and breathable.
- Medium adhesion with woven material that allows it to stretch up to double its length.
- Self-adhesive.
- Easy to unroll and use.
- Sweat proof and water resistant.

CODE	COLOUR	SIZE	ORDER QTY

## ZINC OXIDE TAPE

### FIRM COMPRESSION

#### Most Suitable Use Cases:

Heavy-duty ankle strapping, chronic joint instability, high-impact sports protection, injury prevention, tournament-level support.

### Physiologix Zinc Oxide Tape

Highly rigid tape used to support joints by limiting movement. Suitable for high contact sports like rugby as it is heavy duty and remains intact for sustained periods of time.

- Firm compression and support.
- Rigid material with high adhesion.
- Restricted movement.
- Easy to tear, no need for scissors.
- Designed to tolerate humid environments and friction.
- Ideal for limiting movement in injured joints and assists in preventing injury.

*Rigid  
zinc oxide tape*

## How to Use Kinesiology Tape...

### How Kinesiology Tape Works

Kinesiology Tape recruits blood vessels in a way that helps place blood flow where the tape is applied.

It increases oxygen and decreases inflammation and swelling.

### Kinesiology Tape Application

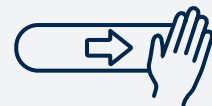

Clean any oils or lotions from the area

Trim excess hair for better adhesion

Avoid stretching the ends of the tape

After applying, firmly rub the tape to activate adhesion

### Types of Kinesiology Tape Cuts

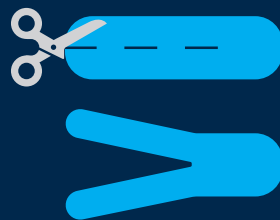

#### I - Strip

It's one long piece of tape that you can cut to size.

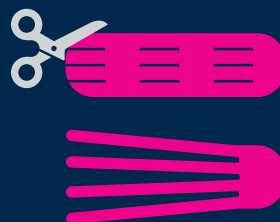

#### Y - Strip

This has one long vertical cut dissecting it, that runs up to the middle section of the strip.

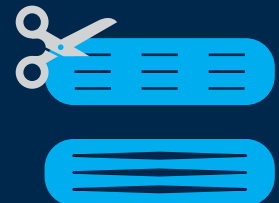

#### Fan - Strip

This is achieved by criss-crossing I-Strips and can be more effective when repeating this multiple of times.

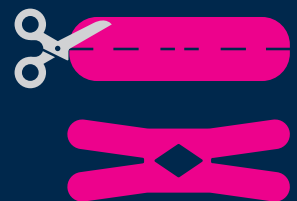

#### Web - Strip

The web-cut has its ends intact, unlike the fan cut. This needs to be cut from the inside the edge of the tape to keep it intact.

#### X - Strip

This method is formed by two strips and making a long vertical cut in both ends of each strip.

**NOTE:** With all taping styles, the corners should always be neatly rounded off with a pair of scissors.

# Hot & Cold Therapy

## Solutions for Relief and Recovery

Our range of hot & cold sport therapy products include single use and reusable hot packs, ice packs and combination hot/cold packs. Great for effective relief from muscular aches and pains, joint stiffness, backache, sprains and strains, swelling and minor injuries.

MD5651M	1	1
MD5651L	1	1

Reduces pressure on the toes and metatarsals

### Gel Toe Crests

The Medicare Gel Toe Crests are expertly designed to provide effective support and relief for curled toes and hammer toe. Made with soft gel containing mineral oil, they help alleviate friction and discomfort caused by toe misalignment.

By reducing pressure on the toes and metatarsals, these toe crests promote better alignment and enhance overall foot comfort, making them an excellent choice for daily wear.

- 2 x Gel Toe Crests.
- Unique Biogel® formation eases pressure and friction.

### Attends® Soft Shaped Incontinence Pads

Attends® Soft are a range of anatomically shaped pads that can be worn discreetly with your own underwear. The pad has a breathable back sheet and absorbent core to help reduce the risk of leakage, provide odour protection and skin dryness.

Available in a range of absorption degrees, all to give protection for light to heavy bladder weakness.

- Smallest sizes are individually wrapped for even more hygiene.
- Breathable backsheet for extra wearing comfort.
- Odour Protection, in order to prevent unpleasant smells.
- The higher absorbency Soft pads (6 & 7) are smaller and more discreet than traditional shaped pads.

**Attends® Pull-Ons**

Attends® Pull-On are absorbent disposable pants designed to manage heavy bladder and/or bowel incontinence (urinary/faecal). These pants look like regular underwear to help you feel confident throughout the day, and can be worn without any other underwear required.

The pants have a flexible shape which fit close to the body and an absorbent core to help reduce the risk of leakage.

- Can easily be pulled up and down like normal underwear.
- Superior fit and feel.
- 100% Breathable for All-around Air Comfort.
- Maxi Comfort Technology. Full panel elastics with ultrasonic bonding.
- The powerful absorbent core locks in any liquid and odour.
- Soft and skin-friendly: The skin tolerability of Attends® Pull-Ons is dermatologically approved by proDERM Institute for Applied Dermatological Research.

**MoliCare® Premium Mobile Level 5 Large 14's**

- Level: 5 Drops (moderate incontinence).

**MoliCare® Premium Mobile Level 6 Medium 14's**

- Level: 6 Drops (moderate incontinence).

MoliCare® Premium Mobile 5 & 6 Drop Level pull-up pants look and feel like regular underwear through anatomical shape, soft material and elastics for a comfortable fit.

**Features of both products:**

- The absorbent core neutralises odour and holds liquids quickly for a dry feeling.
- Easy tear-open side seams mean they can be easily pulled on and off without the need to open and close any tapes or additional help.
- Absorption/Capacity: 680ml.
- Pack size: 14 per pack.
- Size: Medium (Hips 80-120cm/31 to 47 inches)
- Wetness indicator on backing shows when to change the product.
- Maximum leakage protection is assured based on high-quality materials and the cuff system.
- Tear-open side seams for easy and convenient removal.
- Coloured stripes indicate front of pull-up pant.
- Dermatologically tested and ph. 5.5 skin neutral to maintain healthy skin.

**Attends® Slip Active**

Attends® Slip Active 10 are all-in-one products designed to manage heavy urinary and/or faecal incontinence. The breathable textile like wings provide comfort and support around the waist, and the re-sealable fixation system provides a close and comfortable fit to minimise leakages.

- Positioning tapes and two re-sealable fixation tapes for ease of fitting.
- Poly back sheet.
- Protects against leakage and odours.

### Attends® Stress Pads For Men Level 4 14's

Attends® For Men 4 are shield shaped inserts designed for men with moderate bladder leakage. Designed for the male anatomy, this insert is thin and discreet, featuring our superabsorbent core to help you remain dry throughout the day.

- Attends® Stress Pads/Contours Pads are suitable for men who suffer with incontinence due to aging or changed prostate conditions who experience a sudden urge to go to the toilet in the middle of the night, or larger gushes of urine loss.
- Fixation tape to easily be worn with your own underwear.
- Specifically designed to absorb light-moderate amounts of bladder and bowel weakness.
- Leakage protection barriers on both sides of the pad provide increased protection.
- Quick Dry technology ensures a dry top layer and soft and dry skin.
- Odour Protection locks in unpleasant odours in the core of the pad.
- Anatomically shaped, designed for men.
- Discreet and comfortable to wear.
- Protects against leakage and odours

## Attends® Cover-Dri Underpad Plus

Attends® Cover-Dri Plus is our protective underpad to be used for light to moderate urinary incontinence. The absorbent hexagon pads on the sheet distribute wetness quickly and evenly, absorbing liquid and preventing mess

When the pad is used, dispose of in a bin and feel confident that your surfaces are protected and dry.

- Underpads for light to moderate urinary incontinence and clinical procedures.
- Soft and comfortable top sheet.
- Non-slip waterproof backing.
- All round leakage barrier reduces the risk of leakage.
- Protects against leakage and odours.

### MoliCare® Premium Bed Mat Level 7 30's

MoliCare® Bed Mats provide an extra layer of security or as a direct underpad. They are ideal to be used with beds or even chairs, furniture or other surfaces which need protection. Made of disposable cellulose fluff, they are absorbent and have a waterproof polythene backsheet to protect against leaking. Perfect for night-time or for longer periods spent seated or in bed.

- Pack Size: 30 per pack.
- Level: 7 Drops (severe/very severe incontinence).
- Meets EU Medical Device Regulation for Class 1 products.
- Dermatologically tested and skin-friendly.
- Single-use secure protection.
- Grip edging allows for easier unfolding of bed mat.

### MoliCare® Premium Bed Mat Level 5 100's

MoliCare® Bed Mat products provide extra protection for various surfaces and the rectangular pads are the classic protection alternative for pads.

The new MoliCare® Premium Bed Mat 5 Drops: Disposable bed mat with an absorbent core made of cellulose fluff providing hygienic care and extra protection.

- Pack Size: 100 (4 x 25) per pack.
- Hygienic Care: Single-use protection.
- Absorbs liquid and provides extra protection for various surfaces.
- Dermatologically tested and skin-friendly.
- Grip edging allows for easier unfolding of bed mat.
- Absorbent core made of cellulose fluff.
- Waterproof polyethylene back sheet.

# TERMS & CONDITIONS

---

All business undertaken by Fleming Medical Ltd. (hereinafter called the company) as principles, agents, wholesalers, distributors or suppliers, is transacted subject to the following terms and conditions in so far as they or any of them may be modified or varied by the company in writing and every condition herein shall be a condition of all agreements between the company and a contracting party or agent for such a party. No condition imposed by a purchaser or agent will be binding on the company unless specifically accepted by the company in writing.

## DELIVERY

Goods shall be delivered by the company to the customer or to a specified address nominated by the customer. The risk of damage or deterioration of the goods arising after dispatch will be at the risk of the customer after the goods have left the company's premises. Any time or date named by the company for delivery is given and intended as an estimate only and the company shall not be liable to make good any damage or loss whatsoever arising directly or indirectly out of delay in delivery. The risk in the goods shall pass to the customer at the point of delivery i.e. when goods leave the company's premises.

## TITLE

Notwithstanding delivery and the passing of risk, the property in the goods shall remain with the company until the customer has paid all monies owed in full, to the company under this contract or any contract or otherwise. Until such payment is made by the customer, the customer shall possess all goods and materials as the property in which is vested in the company by virtue of this clause on a fiduciary basis only and if the company so requires the customer shall store such goods and materials at no cost to the company so that they are clearly identified as belonging to the company. If any payment is overdue the company may (without prejudice to any of its other rights and remedies) recover and resell any or all of such goods and materials and may enter the customer's premises for that purpose.

## SALE OR RETURN

The clause herein relating to retention of title does not entitle the customer to return goods or refuse/delay payment on the grounds that the property in such goods has not been passed to the customer. It is explicitly against company policy to sell goods on a sale or return basis.

## QUANTITY DELIVERED

Every effort will be made to deliver the quantity as ordered. Any shortages or claims of shortages must be brought to the company's attention in writing within five working days. Any claims thereafter will not be entertained and cannot be used as an excuse for non payment of account. Any complaint of failure to deliver goods invoiced must also be notified to the company in writing within seven days of the date of the invoice.

## COMPATIBILITY

The responsibility for establishing the suitability of any the company's products for its intended use shall rest upon the customer and the company shall not be liable for any loss or damage whether consequential or otherwise, and the customer shall not depend upon representations made by the company or on behalf of the company to establish suitability of the company's products.

## GENERAL

Customers own condition of purchase or by our standard of condition of purchase shall not apply unless specifically accepted by the company in writing in advance of goods being ordered.

## CLAIMS

If any goods supplied by Fleming Medical Limited prove on inspection to be defective in material workmanship, the company undertakes as its option to replace the same or refund to the customer, the price of the goods. Under no circumstances will liability exceed the cost of replacement (at the company's option) or the price paid by the customer for such goods.

## WARRANTY

The company shall not under any circumstance or whatsoever be liable for any damages where the consequential or otherwise howsoever caused or occasioned and this undertaking is given in place of and excludes all other warranties and condition whatsoever whether implied by statute or otherwise. The customer shall be responsible for any non-recoverable costs incurred by the company should the customer cancel an order it has placed.

## RETURN OF GOODS

The company is unable to accept return of goods without prior notification to our offices in writing. And only when it has given authorisation for such return can goods be accepted. Any goods returned for credit will be liable to incur the following handling charges.

0-90 days - 25%    Over 90 days - 50%  
Over 180 days - at discretion of company

For goods to be accepted for refund, goods must be currently stocked and not a discontinued line. They also must be in perfect merchandisable condition and capable of resale and be completely without defect. Any such damage or defect will totally cancel any obligation by the company for any refund whatsoever.

## PAYMENT

Payment of account must be made within thirty days of month end in which the goods were supplied and shall be strictly nett. Cheques shall be made payable to the company (Fleming Medical Limited) and not to any individuals. At the end of each calendar month any account which is overdue shall be liable to have interest charged thereon at the rate of 2.5% owed per month. Credit terms offered by the company are thirty days from month end of invoice date but such terms may be terminated at any time without prior notice by the company whereupon all balances, inclusive of interest, shall become due and owing forthwith. The operation of this term shall be at the companies absolute discretion.

The prices charged are at the date of dispatch of goods. It is an expressed condition of sale that in the event of the company having to recourse to legal action or debt collection agents against the customer in order obtain of outstanding accounts any costs in doing so are payable by the customer on a full indemnity basis and the company shall have the right to charge without notice interest at 2.5% per month, then currently enforce on any overdue accounts for as long as they are overdue.

Prices quoted in this catalogue are correct at the time of publication. However, our prices are regularly reviewed and are subject to change. For confirmation of our current prices please contact our customer service team on 061 304600.
