

WHY YOUR WORKPLACE NEEDS AN AED

Having an AED in the workplace
could mean the difference
between life and death

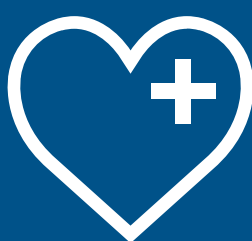

**OVER
350,000**

are affected by Sudden
Cardiac Arrest in Europe
each year

Training for employees on
how to use the device
could mean the difference
between life and death

A victims chance of survival
from cardiac arrest decreases
by 7-10% per minute if they
do not receive treatment

**UP TO
74%
INCREASED**

chance of survival if an AED
is used and effective CPR is
performed within 3-5
minutes of cardiac arrest
